PROFILE

Senior Full Stack Developer with 6+ years of experience building scalable web, mobile, desktop, SaaS, and enterprise applications using React.js, Next.js, React Native, Node.js, Express.js, Electron.js, MongoDB, PostgreSQL, and modern cloud infrastructure.

Proven expertise in delivering production-ready food delivery platforms, POS systems, SaaS products, desktop applications, real-time applications, and cross-platform mobile solutions for startups and international clients. Experienced in designing user interfaces, developing REST APIs, managing cloud deployments, implementing CI/CD pipelines, and maintaining high-performance applications that solve real-world business challenges.

Strong technical expertise in JavaScript, TypeScript, React.js, Next.js, React Native, Electron.js, Node.js, Express.js, MongoDB, PostgreSQL, Prisma ORM, Redux-Toolkit, Zustand, Jotai, Firebase, Tailwind CSS, Material UI, Shadcn, Radix UI/Base UI, Bootstrap, Git, Linux, AWS, Jenkins, and modern software development practices.

EMPLOYMENT HISTORY

Full Stack Developer (MERN), Liefermars (Full Time - Remote)
July 2022 – Present

• Maintain and enhance a multi-vendor food delivery platform built with React.js.
• Maintain frontend, backend, and DevOps infrastructure.
• Developed and launched multi-vendor food delivery mobile applications using React Native for Android and iOS.
• Developed a real-time restaurant order management application for POS terminal devices using React Native.
• Implemented receipt printing functionality through POS hardware integration.
• Managed AWS EC2 infrastructure and Jenkins CI/CD pipelines.

• Used Atlassian Bitbucket for version control.
• Coordinated development tasks using Trello.
• Collaborated with developers and stakeholders through Slack.

Full Stack Developer (MERN), OBISTAR Holdings LLC (Contract - Remote)
July 2024 – October 2025

• Created and maintained robust APIs using Node.js and Express.js.
• Maintained and enhanced SaaS products built with Next.js, Prisma ORM, MongoDB, and TypeScript.
• Replaced ORPC with TRPC and implemented Hono API as a backend service.
• Converted React.js applications to Next.js.
• Managed CI/CD pipelines and Hetzner VPS infrastructure.

React.js / Vue.js Developer, Aichmey.dev (Full Time - Remote)
September 2021 – June 2022

• Worked on Quickly web application and Quickly Chrome Extension.
• Developed a standalone meeting scheduler application using Next.js.
• Built reusable UI components using Object-Oriented Programming principles.
• Developed React component libraries including Slide View and Table Grid.
• Implemented Vue.js components and reusable functions.
• Worked closely with backend teams using Redux state management.

React JavaScript Developer, Machotics (Full Time - Remote)
January 2021 – July 2021

• Developed web applications using HTML5, CSS3, Bootstrap, Material UI, JavaScript, and React.js.
• Optimized performance to improve page load speed and user experience.
• Integrated admin and user dashboards with role-based access control.
• Implemented WYSIWYG editors, Google Maps API, and drag-and-drop functionality.
• Ensured cross-browser compatibility and bug fixing.

React JavaScript Developer, BlockVentors (Part Time - Remote)
January 2021 – July 2021

• Designed and developed React.js and Redux-based web applications.
• Built responsive user interfaces using modern frontend technologies.
• Implemented centralized Redux state management for blockchain communication.

Freelancing
2016 – Present

• Developed numerous websites and web applications from scratch.
• Built Chat, Quiz, Calculator, Stopwatch, and Todo applications using JavaScript.
• Developed an OLX clone using React, Redux, and Firebase.
• Built Blood Bank and Campus Recruitment mobile applications using React Native and Firebase.

Web Developer / Accountant, Maxim Pakistan
October 2018 – July 2020

• Maintained bookkeeping, balance sheets, petty cash ledgers, invoices, and ERP records.

Assistant Accountant, Ghaziani Industries
August 2017 – March 2018

• Managed bookkeeping, balance sheets, and petty cash ledgers.
• Maintained sales purchase record in Excel
• Worked as an Assistant manager.

Featured Enterprise Projects

1. SaaS Ecosystem Platform (Ongoing)

Key Features:
• Developed a modern web application using Next.js, TypeScript, Hono, and TRPC.
• Built a cross-platform mobile application using Expo and React Native.
• Developed a desktop application using Electron.js.
• Designed a centralized API system to synchronize data across all platforms.
• Implemented shared authentication, authorization, and business logic across Web, Mobile, and Desktop clients.
• Developed SaaS/Organizations and Admin dashboard features for managing operational workflows.
• Developed scalable backend services and API architecture for multi-platform communication using Hono API .
• Maintained production deployments and platform enhancements.

2. Restaurant POS (Kassensystem) & Delivery Management Platform – German Market
May 2025 – Present

Designed and developed a complete restaurant management and delivery ecosystem for the German market.

Key Features:
• Developed a web-based POS (Kassensystem) application for restaurant operations and

order management.
• Built a dedicated Rider Application using React Native for Android devices.
• Developed backend services and REST APIs using Node.js and Express.js.
• Implemented real-time order processing and delivery workflows.
• Integrated third-party food delivery services including Lieferando and Wolt.
• Developed restaurant dashboard features for menu management, order tracking, and operational workflows.
• Built delivery assignment and rider management functionality.
• Implemented authentication, authorization, and role-based access control.
• Designed scalable database architecture for restaurant and delivery operations.
• Maintained production deployments and ongoing platform enhancements.

PROJECTS

Campus Recruitment System (React Native + Firebase)

• Developed a fully functional recruitment platform for recruiters, students, and college administrators.
• Students could browse job vacancies, recruiters could post jobs, and administrators could manage users and job postings.
• Implemented Firebase backend with real-time communication.

Blood Bank Application (React Native + Firebase)

• Developed a mobile application connecting blood donors with recipients.
• Integrated Google Maps API for donor location tracking.
• Enabled users to request and search for blood donors.

Multi-Vendor Food Delivery Application

Android: https://play.google.com/store/apps/details?id=com.liefarmars&hl=en
iOS: https://apps.apple.com/in/app/liefermars/id6479199529

DTask (Electron.js)

• Developed an open-source desktop application to monitor and manage running system tasks.
Repository: https://github.com/saleheen-dev/Dtask

APK Upload Panel

• Single Page Application for managing APK uploads used in custom in-app update systems.
Repository: https://github.com/saleheen-dev/apk-upload-panel

INTERNSHIP

Front End Development, interns.pk (SPB548497/12032021)

EDUCATION

Web & Hybrid Mobile App Development Course, Saylani Welfare (Mar 2020 - Dec 2020)

Intermediate, Govt. Dehli College (2009)

Matric, Rakhshinda Public School (2007)
